

Mr. Wolf was representing himself and other individuals as a small foreign faction. (I think that the weapons that this country exports all over the world have killed many children and I just hate to see people fan the flames of those problems)

The Department of Defense is an internal function of the United States Government. Mr. Ramsey's check came from Lockheed Martin the largest number one arms exporter in the country. Mr. Ramsey is likely selling computers to the Pentagon in 1996 to further the Department of Defense's capabilities.

When he is speaking about business he crosses out the don't . He was talking continually in my home about Ramsey business having strong ties to supporting the sales of guns that were killing 3<sup>rd</sup> world children and speaks in his deposition that Ramsey is a merchant of death and was part of the military industrial complex.

He targeted John Ramsay in a small very visible town. He wrote his political views 14 months after the murder to FOX news. He took the life of Jonbenet to gain political revenge and ruin Ramsey. Plus a little girl seems to have been on his sexual satisfaction list.
